

CAMEL JET 1600

TRUCK MOUNTED SEWER CLEANER

Since 1973

PERFORMS WELL UNDER PRESSURE

Camel Jet is the undisputed powerhouse for keeping sanitary and storm sewer lines, laterals, and drainage lines clean and free flowing. Its time proven high pressure water jetting system utilizes a continuous flow of 65 or 80 gpm (246.1 or 302.8L) and pressure up to 2,500 PSI (172.5 Bars) from positive displacement water pumps.

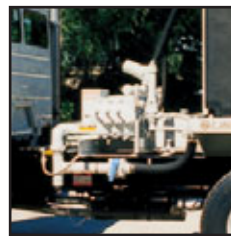

But, this is only one reason why Camel Jet 1600 belongs in your fleet. Another is choice. From water pumps to drive systems to piping and hose reel location, a unit can be customized to fit

your needs.

Having the option of selecting from various drive systems -- auxiliary gas or diesel engines, Hydrostatic, Hotshift PTO's, or splitshaft transfer case enhances Camel Jet flexibility.

**Rear-mount 180° Articulating Hose Reel
with Patented Containment System**

**Convenient access to major components
allows for quick and easy maintenance.**

Select from front or rear fixed or articulating hose reels and you have a customized unit with total operator convenience. And the Lexan Containment System helps protect the operator from hose rupture or high pressure water.

The Camel Jet carries 1,600 gallons (6,056.7L) of water in three modular tanks. Formed of rotationally molded polyethylene with ultra violet stabilizers, costly repairs associated with metal tanks are eliminated.

When you need a sewer cleaner with pressures and flows to perform to your specifications -- specify Camel Jet.
